ASSESSMENTS TO HELP YOU MEET THE NEEDS OF SPANISH-SPEAKING CHILDREN AND ADULTS
This guide provides an overview of the many assessments we offer to help you address the needs of Spanish-speaking children and adults. These valid and reliable assessments have been developed with the high standards of excellence you have come to expect from Pearson, so you know you can trust the results.

A variety of methods are used to develop Spanish-language assessments. Look for the following icons placed throughout this brochure to help you more easily identify the tools that best fit your needs:

- **T** Assessments that offer Spanish translations of the English edition on which they are based, with no changes to items or tasks.
- **A** Adapted assessments that are both translated and modified from the English edition to best suit the population that they are intended to serve. This may include editing certain items to make them more culturally appropriate/relevant, changing the placement of items to achieve a more uniform gradient of difficulty, or introducing new items that are more appropriate for the targeted population.
- **SN** Spanish-language norms collected from U.S.-based Spanish-speaking population.
- **EN** English norms only.

- **Ability** ................................................................. 1–3
- **Neuropsychology** .................................................. 4–5
- **Personality** ............................................................ 6–10
- **Biopsychosocial** .................................................... 11–12
- **Behavior** ............................................................... 13–14
- **Speech & Language** ................................................ 15–19
- **Early Childhood** ................................................... 20
- **Sensory** ................................................................. 21

EIWA®–III  A  SN
Escala de Inteligencia Wechsler para Adultos, Tercera Edición

OVERVIEW

Age Range: 16:0–64:11
Completion Time: VIQ, PIQ, and FSIQ scores: 60–90 minutes:
IQ and index scores: 60–95 minutes
Materials Needed: Includes basic kit with enough materials
to score 25 administrations.
Item 0158896106

A measure of cognitive ability developed for the Puerto Rican population

The EIWA–III is a Spanish-language adaptation of the WAIS®–III,
the most advanced comprehensive cognitive assessment. The EIWA was developed in cooperation with the Ponce School of Medicine in Puerto Rico, helping to ensure that it is culturally appropriate for Puerto Ricans speaking Spanish as well as other Spanish-speaking populations. This edition offers updated items and stimuli to help ensure cultural relevance.

• Standardization sample is based on the 2000 U.S. Census for individuals ages 16:0–64:11 and includes data specific to Puerto Rico.

WISC®–IV Spanish  A  SN
Wechsler Intelligence Scale for Children®, Fourth Edition, Spanish

OVERVIEW

Age Range: 6:0–16:11
Completion Time: Core subtests: 60–90 minutes
Materials Needed: Includes complete kit with enough materials
to score 25 administrations.
Item 0158978846

Profile cognitive strengths and weaknesses in Spanish-speaking children

The WISC–IV Spanish is designed for use with Spanish-language
dominant children who are within their first five years of attending U. S. schools. This test, which provides a Spanish-language adaptation of the WISC®–IV test, can be administered by Spanish-speaking examiners or by English-speaking examiners with a trained Spanish-speaking associate.

• Items accommodate variations of the Spanish language.
• Normative sample is representative of the U. S. Spanish-speaking population originating from many regions, including Mexico, Puerto Rico, Central America, Dominican Republic, Cuba, and South America.
DAS®-II
Differential Ability Scales®, Second Edition,
Early Years Spanish Supplement

**OVERVIEW**

**Age Range:** 2:6–6:11
**Completion Time:** Core battery 45–60 minutes; diagnostic subtests 30 minutes
**Materials Needed:** Includes DAS-II Early Years Spanish Supplement Kit with enough materials to score 25 administrations. Item 0158339525

This kit supplements the DAS-II Complete Kit, which is available in a value bundle with the Spanish supplement. For more information, visit PearsonClinical.com or call 800.627.7271.

**Identify a Spanish-speaking child’s cognitive strengths and challenges more accurately**

The DAS-II Early Years Spanish Supplement enables you to obtain a more accurate picture of Spanish-speaking children’s cognitive strengths and needs by assessing them in their primary language.

• Unique nonverbal administration with pictorial directions.
• Interpreters Manual and modified materials in Supplement Kit provide valuable information that facilitate Spanish assessment.

WNV®
Wechsler Nonverbal Scale of Ability

**OVERVIEW**

**Age Range:** 4:0–21:11
**Completion Time:** Four–subtest battery, 45 minutes; two–subtest battery, 15–20 minutes
**Materials Needed:** Includes complete kit with enough materials to score 25 administrations. Item 0158234596

Minimal verbal instructions in Spanish included in Administration and Scoring manual.

**Assess cognitive ability regardless of language spoken**

The WNV offers an individually administered, nonverbal assessment to help you measure general cognitive ability. This tool was especially designed for use with culturally and linguistically diverse groups. With the WNV, there is no need to administer a variety of instruments to assess special populations.

• Unique nonverbal administration is ideal for Spanish-dominant examinees when no Spanish-speaking clinician or translator is available.
• Specifically created for Hispanic individuals who are neither English-language nor Spanish-language dominant.
KABC™-II  
Kaufman Assessment Battery for Children, Second Edition

OVERVIEW

Age Range: 3–18

Completion Time: Core battery, Luria model: 25–55 minutes; Core battery, CHC model: 25–70 minutes

Materials Needed: Includes complete kit with enough materials to score 25 administrations.
Item 21000A

Assess cognitive abilities and processing skills

Developed with careful attention to cultural sensitivity, the KABC-II is an individually administered measure that offers insights into how a person receives and processes information, helping pinpoint cognitive strengths and weaknesses.

- Test must be administered in English but allows for correct responses in other languages and presents correct Spanish-language responses and teaching text on the easels and record form, making scoring easier and more reliable.
- Nonverbal testing option allows assessment of children whose verbal skills are significantly limited.

KBIT™-2  
Kaufman Brief Intelligence Test, Second Edition

OVERVIEW

Age Range: 4–90

Completion Time: Approximately 20 minutes

Materials Needed: Includes complete kit with enough materials to score 25 administrations.
Item 32300

Assess two cognitive abilities quickly and easily

The KBIT-2 provides a balanced assessment by helping evaluate two distinct cognitive processes: verbal and nonverbal. Developed by cognitive assessment experts Alan and Nadeen Kaufman, the test presents highly valid, reliable results. This quick, cost-effective tool is useful for a broad range of purposes.

- Although the KBIT-2 verbal scale must be administered in English, correct responses in other languages are given credit and correct Spanish-language responses are provided on the record form for the Riddles subtest, making scoring easier and more accurate.
RBANS® Update
Repeateable Battery for the Assessment of Neuropsychological Status® Update

OVERVIEW
Age Range: 12:0–89:11
Completion Time: 30 minutes
Materials Needed: Includes complete English kit and Spanish record forms with enough materials to score 25 administrations. Spanish forms are available to purchase separately.
Item 0158007050 for English kit and Item 0158007255 for Spanish record form A. Spanish Form B also available.
For more information, please visit PearsonClinical.com or call 800.627.7271.

Detect and characterize cognitive decline or neurocognitive status
Offering valuable enhancements, the RBANS Update provides a brief, individually administered battery to assess Immediate Memory, Visuospatial/Constructional, Attention, Language, and Delayed Memory domains.
• Spanish record forms available for forms A and B.
• Equivalency study with RBANS English norms.

Batería Neuropsicológica de Funciones Ejecutivas y Lóbulos Frontales
Battery of Executive Functions and Frontal Lobe, Spanish

OVERVIEW
Age Range: 5–79
Completion Time: 60 minutes
Materials Needed: Includes complete kit with enough materials to conduct 10 administrations.
Item 0158007883.
For more information, please visit PearsonClinical.com or call 800.627.7271.

Identify Spanish-speaking clients’ strengths and weaknesses
Developed for Spanish speakers, the BANFE consists of fifteen tasks widely used and validated in neuropsychological settings for assessing executive functions mediated primarily by the frontal lobes. This test helps clinicians conduct extensive and accurate assessment of damage and functional impairment of the frontal lobes and plan rehabilitation strategies.
• Standardized in Mexico for Spanish-speaking populations.
NEUROPSI Screener  A   SN
Evaluación Neuropsicológica Breve en Español

OVERVIEW

- **Age Range:** 16–86
- **Completion Time:** 20–35 minutes
- **Materials Needed:** Includes complete kit with enough materials to score 20 administrations.
  item 0158570405

Evaluate a broad range of cognitive functions for Spanish speakers

Obtain a brief, reliable, and objective evaluation of a broad range of cognitive functions with NEUROPSI, a standardized general neurocognitive test tailored to Spanish-speaking populations. NEUROPSI provides both qualitative and quantitative data for specific cognitive domains that can be differentially impaired following brain injury.

- Norms are based on 800 monolingual Spanish speakers in Mexico.

NEUROPSI-Atención y Memória  A   SN

OVERVIEW

- **Age Range:** 6–85
- **Completion Time:** 50–60 minutes for people without cognitive disabilities, 80–90 minutes in pathologic populations
- **Materials Needed:** Includes complete kit with enough materials to score 10 administrations.
  item 0158003314

Evaluate attention, memory, and learning functioning in Spanish speakers

NEUROPSI-Atención y Memória helps assess cognitive processes in people with documented or suspected brain lesions (i.e., tumors, traumatic brain injury), developmental disabilities, ADHD, dementia, psychiatric disorders, and other conditions.

- The test was normed on 950 subjects in Mexico. Scores are corrected according to age and education.
**OVERVIEW**

**Age Range:** 18 and older  
**Completion Time:** 60–90 minutes  
(567 true/false items)  
**Materials Needed:** Includes complete English kit with materials to score 3 computerized interpretive administrations and 1 Spanish softcover test booklet.  
*Items 00751 or 63605, and 24024*  
For more information regarding our new web-based scoring and reporting system, visit [PearsonClinical.com/Qglobal](http://PearsonClinical.com/Qglobal).

**A most widely used and researched test of adult psychopathology**

Used by clinicians to assist with the diagnosis of mental disorders and the selection of appropriate treatment methods, the MMPI-2 test helps to meet the assessment needs of mental health professionals in an ever-changing environment.

---

**OVERVIEW**

**Age Range:** 14–18  
**Completion Time:** 45–60 minutes  
(478 true/false items)  
**Materials Needed:** Includes complete English kit with materials to score 3 computerized interpretive administrations, Spanish manual supplement, and 1 Spanish softcover test booklet.  
*Items 63633 or 00726, and 25032, 25017*  
For more information regarding our new web-based scoring and reporting system, visit [PearsonClinical.com/Qglobal](http://PearsonClinical.com/Qglobal).

**Unique features include adolescent-specific scales and setting-specific reports**

The MMPI-A test provides an empirically based measure of adolescent psychopathology to aid you in problem identification, diagnosis, and treatment planning.
**MCMI®-III**
Millon® Clinical Multiaxial Inventory-III

**OVERVIEW**

**Age Range:** 18 and older  
**Completion Time:** 25–30 minutes (175 true/false items)  
**Materials Needed**: Includes complete English kit with enough materials to score 3 computerized administrations, 1 Spanish test booklet, and 25 Spanish Q Local™ answer sheets. Items 00763, 33021, and 51512  
*Does not include Q Local annual license fee.

Assess *DSM-IV*-related personality disorders and clinical syndromes

Valued for its brevity, the MCMI-III helps you quickly and accurately assess *DSM-IV*-related personality disorders and clinical syndromes. The treatment-oriented Interpretive Report presents an integrated and personalized view of results.

---

**MACI®**
Millon Adolescent Clinical Inventory

**OVERVIEW**

**Age Range:** 13–19  
**Completion Time:** 20–25 minutes (160 true/false items)  
**Materials Needed**: Includes complete English kit with enough materials to score 3 computerized administrations, 1 Spanish test booklet, and 25 Spanish Q Local answer sheets. Items 45201, 46414, and 51428  
*Does not include Q Local annual license fee.

A brief adolescent personality inventory with a strong clinical focus

Designed specifically for teens, the MACI helps you identify early signs of mental health disorders. Alignment with *DSM-IV* classifications helps ensure the MACI’s clinical utility and facilitates communication among practitioners.

---

**MAPI®**
Millon Adolescent Personality Inventory

**OVERVIEW**

**Age Range:** 13–18  
**Completion Time:** 20–30 minutes (150 true/false items)  
**Materials Needed**: Includes complete English kit with enough materials to score 3 computerized administrations, 1 Spanish test booklet, and 25 Spanish Q Local answer sheets. Items 00684, 46411, and 51408  
*Does not include Q Local annual license fee.

Assess personality characteristics in both typical and troubled teens

Normed on both normal adolescents and adolescent patients, the MAPI outlines personality in three distinct scale dimensions: personality styles, expressed concerns, and behavioral patterns.
SCL-90-R®
Symptom Checklist-90-Revised

OVERVIEW

Age Range: 13 and older
Completion Time: 12–15 minutes (90 items, 5-point rating scale)
Materials Needed: Includes complete English kit with materials to score 3 computerized administrations, 1 Spanish test booklet, and 25 Spanish answer sheets. Items 63724 or 00737 and 05672
For more information regarding our new web-based scoring and reporting system, visit PearsonClinical.com/Qglobal.

Gain a quick overview of a patient’s symptoms of psychopathology

The time-honored SCL-90-R test helps you evaluate nine symptoms of psychopathology and provides an overview of a patient’s symptoms and their intensity at a specific point in time. This brief assessment is well suited for measuring patient progress and treatment outcomes.

BSI®
Brief Symptom Inventory

OVERVIEW

Age Range: 13 and older
Completion Time: 8–10 minutes (53 items; 5-point rating scale)
Materials Needed: Includes complete English kit with materials to score 3 computerized administrations and 25 Spanish answer sheets. Items 62323 or 00740 and 51422
For more information regarding our new web-based scoring and reporting system, visit PearsonClinical.com/Qglobal.

Quickly measure psychological symptoms in a variety of settings

The BSI test provides a shorter version of the SCL-90-R instrument and can be used to help identify problems before they become acute, assess patient readiness prior to medical treatments such as bariatric surgery, and facilitate treatment decisions.
BDI®-II
Beck Depression Inventory®-II

**OVERVIEW**
- **Age Range:** 13–80
- **Completion Time:** 5 minutes
- **Materials Needed:** Includes English manual and 25 Spanish record forms. Items 0158018389 and 0158018494

For more information regarding our new web-based scoring and reporting system, visit PearsonClinical.com/Qglobal.

The most widely used instrument for detecting depression

Aligned with *DSM–V®* criteria, the BDI-II provides a criteria-referenced self-report to help you measure the intensity of depression symptoms in clinical and normal patients. This clinically sensitive instrument takes only five minutes to complete.

BAI®
Beck Anxiety Inventory®

**OVERVIEW**
- **Age Range:** 17–80
- **Completion Time:** 5 minutes
- **Materials Needed:** Includes English manual and 25 Spanish record forms. Items 0158018419 and 0158018923

For more information regarding our new web-based scoring and reporting system, visit PearsonClinical.com/Qglobal.

The most widely used instrument for detecting anxiety

The BAI offers a brief self-report to help screen for anxiety. This reliable instrument has been found to discriminate well between anxious and nonanxious diagnostic groups in a variety of clinical populations.
BHS®
Beck Hopelessness Scale®

**OVERVIEW**

**Age Range:** 17–80  
**Completion Time:** 5–10 minutes  
**Materials Needed:** Includes English manual and 25 Spanish record forms. Items 0158133617 and 0158018966  
For more information regarding our new web-based scoring and reporting system, visit PearsonClinical.com/Qglobal.

**Measure three major aspects of hopelessness**

Designed to help identify individuals at risk for suicide, the BHS helps you measure three major aspects of hopelessness: feelings about the future, loss of motivation, and expectations. This brief test is well suited for repeat administrations to help monitor progress.

BSS®
Beck Scale for Suicide Ideation®

**OVERVIEW**

**Age Range:** 17–80  
**Completion Time:** 5 minutes  
**Materials Needed:** Includes English manual and 25 Spanish record forms. Items 0158018451 and 0158018907  
For more information regarding our new web-based scoring and reporting system, visit PearsonClinical.com/Qglobal.

**Briefly evaluate for suicide risk**

The BSS helps measure a broad spectrum of attitudes and behaviors that clinicians routinely consider when assessing patient suicide risk. This instrument also reveals specific suicidal characteristics that require greater clinical scrutiny.
### MBMD®
Millon® Behavioral Medicine Diagnostic

**Overview**
- **Age Range:** 18–85
- **Completion Time:** 20–25 minutes (165 true/false items)
- **Materials Needed**: Includes complete English kit with enough materials to score 3 computerized administrations of the Pain Patient Reports and 25 Spanish Q Local™ answer sheets. Items 01003 and 52019

*Does not include Q Local annual license fee.

Bariatric, Pain Patient, and General Medical Reports are also available. For more information, please visit PearsonClinical.com or call 800.627.7271.

Assess psychosocial factors that may support or interfere with a chronically ill patient's course of medical treatment

Brief yet comprehensive, the MBMD helps gather a range of clinical information to provide a deep and broad view of the patient.

### BHI™ 2
Battery for Health Improvement 2

**Overview**
- **Age Range:** 18–65
- **Completion Time:** Approximately 30 minutes (217 multiple-choice)
- **Materials Needed**: Includes complete English kit with enough materials to score 3 computerized administrations, 1 Spanish test booklet, 25 Q Local answer sheets. Items 46138, 46146, and 46131

*Does not include Q Local annual license fee.

Gain a comprehensive view of biopsychosocial factors that can affect medical treatment

Developed for pain patients, the multidimensional BHI 2 test helps you assess a broad range of factors, including pain and function, depression and anxiety, test-taker’s attitude, and family and job issues.

### BBHI™ 2
Brief Battery for Health Improvement 2

**Overview**
- **Age Range:** 18–65
- **Completion Time:** Approximately 10 minutes (63 multiple-choice)
- **Materials Needed**: Includes complete English kit with enough materials to score 10 computerized administrations and 25 Spanish Q Local answer sheets. Items 46109 and 46106

*Does not include Q Local annual license fee.

Assessment of pain, function, and psychological factors commonly associated with pain patients

Developed for pain patients, the brief BBHI 2 test helps clinicians evaluate a patient’s readiness for surgery or other medical treatments by identifying biopsychosocial issues that can impact treatment.

800.627.7271 | PearsonClinical.com | 11
P-3®

Pain Patient Profile

**OVERVIEW**

*Age Range:* 17–76  
*Completion Time:* 15 minutes  
(44 groups of statements with three statements per group)

**Materials Needed**: Includes complete English kit with enough materials to score 3 computerized administrations and 25 Spanish Q Local™ answer sheets. 
*Items 00830 and 51542*

*Does not include Q Local annual license fee.

**Quickly evaluate for depression, somatization, and anxiety in pain patients**

The P-3 test focuses on the factors most frequently associated with chronic pain—depression, anxiety, and somatization. Normed on pain patients, this brief test provides you with easy-to-interpret results.

BSI® 18

Brief Symptom Inventory 18

**OVERVIEW**

*Age Range:* 18 and older  
*Completion Time:* Approximately 4 minutes  
(18 items; 5-point rating scale)

**Materials Needed**: Includes complete English kit with enough materials to score 3 computerized administrations and 25 Spanish Q Local answer sheets. 
*Items 00974 and 51943*

*Does not include Q Local annual license fee.

**Quickly assess psychological distress in medical patients**

The BSI 18, which offers a shortened form of the BSI, gathers patient-reported data to help you evaluate psychological distress in medical settings. The BSI 18 helps measure three primary symptom dimensions and provides an overview of a patient’s symptoms and their intensity at a specific point in time.
The BASC-2 family of products offers a comprehensive, integrated system to help you identify and manage behavioral and emotional problems of preschool through college-age individuals

- **Behavioral and Emotional Screen System**—Quickly and systematically screen a class for behavioral or emotional problems.

- **PROQ™ (Parenting Relationship Questionnaire)**—Assess the parent-child relationship.

- **Parent Ratings Scales**—Measure a child’s adaptive and problem behaviors in the community and home setting.

- **Self-Report of Personality**—Gain insights into an individual’s thoughts and feelings.

- **Structured Developmental History**—Conduct a comprehensive survey of a child’s background.

- **Progress Monitor: Parent and Student forms**—Easily track the effectiveness of behavioral and emotional interventions.

Many BASC-2 products are available in Spanish. For more information, please visit PearsonClinical.com or call 800.627.7271.
**Vineland™-II**

Vineland Adaptive Behavior Scales, Second Edition

**OVERVIEW**

**Age Range:** Birth–90: Survey Interview Form, Expanded Interview Form, and Parent/Caregiver Rating Form; 3:0–21:11: Teacher Rating Form

**Completion Time:** 20–60 minutes—Survey Interview and Parent/Caregiver Rating Forms; 25–90 minutes—Expanded Interview Form; 20 minutes—Teacher Rating Form

**Materials Needed:** Many Vineland-II products are available in Spanish. For more information, please visit PearsonClinical.com or call 800.627.7271.

**The leading instrument for supporting the diagnosis of intellectual and developmental disabilities**

The Vineland-II helps you measure the adaptive behavior of individuals with intellectual and developmental disabilities, autism spectrum disorders (ASDs), attention deficit/hyperactivity disorder (ADHD), post-traumatic brain injury, hearing impairment, dementia, Alzheimer’s disease, and other conditions.

---

**SSIS™ Rating Scales**

Social Skills Improvement System Rating Scales

**OVERVIEW**

**Age Range:** 3–18

**Completion Time:** 10–25 minutes

**Materials Needed:** Includes complete kit with enough materials to score 25 administrations. Item 14125

**Evaluate social skills, problem behaviors, and academic competence**

The SSIS Rating Scales offers you an evidence-based, multirater test for targeted assessment of individuals and small groups—with direct links to interventions. This latest revision includes updated norms, improved psychometric properties, and new subscales.

---

**PDDST-II™**

Pervasive Developmental Disorders Screening Test-II

**OVERVIEW**

**Age Range:** 1–4

**Completion Time:** 15 minutes

**Materials Needed:** Includes English examiner’s manual and 25 Spanish response forms for Stages I, II, and III. Items 0761635149, 0761600175, 0761600183, and 0761600191

**Screen for autism spectrum disorders**

The PDDST-II uses parent/caregiver questionnaires to provide you with valid, reliable information that can help differentiate children with autism spectrum disorders from children experiencing other developmental problems.
CELF®-4 Spanish
Clinical Evaluation of Language Fundamentals®, Fourth Edition Spanish

**OVERVIEW**

**Age Range:** 5:0–21:11  
**Completion Time:** 30–45 minutes for core language score; Total assessment: variable  
**Materials Needed:** Includes complete kit with all the necessary materials to conduct 10 administrations. Item 015803841X

**Assess student’s receptive/expressive language ability**

CELF-4 Spanish gives you a flexible, multi-perspective assessment process to pinpoint a student’s strengths and weaknesses in semantics, morphology, syntax, pragmatics, and classroom language skills. CELF-4 Spanish features high sensitivity (.96) and specificity (.87) for the core language score.

- Provides an item set and themes specifically developed for a diverse range of Spanish speakers—not a translation of the English edition.
- Item order and normative scores are based on the performance of 800 monolingual and bilingual students living in the United States.

CELF® Preschool-2 Spanish

**OVERVIEW**

**Age Range:** 3:0–6:11  
**Completion Time:** Level 1: 15–20 minutes; Entire test: variable  
**Materials Needed:** Includes complete kit with all the necessary materials to conduct 25 administrations. Item 0158036727

**Evaluate preschoolers’ language ability**

CELF Preschool-2 Spanish is an in-depth assessment of semantics, morphology, and syntax skills in Spanish. The test uses an approach that is engaging for preschool children who are verbal but have specific language deficits.

- Provides an item set and themes specifically developed for a diverse range of Spanish speakers—not a translation of the English edition.
- Vocabulary variations for children from different Spanish-speaking regions are listed in the Examiner’s Manual.
- Item order and normative scores are based on 464 monolingual and bilingual children living in the United States and Puerto Rico.
PLS™-5 Spanish
Preschool Language Scale, Fifth Edition Spanish

**OVERVIEW**

**Age Range:** Birth–7:11  
**Completion Time:** 20–45 minutes  
**Materials Needed:** Includes complete kit with all the necessary materials to conduct 15 administrations.  
Item 0158659104

**Capture language skills in both Spanish and English in one dual-language score**

PLS-5 Spanish helps you obtain an accurate picture of a young child’s emerging communication and language skills. The Spanish edition is not a translation of the English test—it includes different item sets, which appear in the order that reflects the developmental sequence of acquisition in Spanish.

- Ideal for children who are pre-verbal or have limited expressive skills.  
- Provides dual-language scores for Auditory Comprehension, Expressive Communication, and Total Language.  
- Normed with 1,150 monolingual and bilingual Spanish-speaking children in the United States and Puerto Rico.

PLS™-5 Spanish Screening
Preschool Language Scales, Fifth Edition Screening Tests

**OVERVIEW**

**Age Range:** Birth–7:11  
**Completion Time:** 5–10 minutes  
**Materials Needed:** Includes complete kit with all the necessary materials to conduct 25 administrations.  
Item 0158655206

**Brief, easy-to-use, Spanish speech and language screener**

The PLS-5 Spanish Screening Test is an efficient tool to help you identify Spanish-speaking infants, toddlers, and young children at risk for language disorders. Now available in Spanish, this tool screens for a broad spectrum of skills within six speech and language areas—in just 5 to 10 minutes.

TVIP
Test de Vocabulario en Imágenes Peabody

**OVERVIEW**

**Age Range:** 2:6–17:11  
**Completion Time:** 10–15 minutes  
**Materials Needed:** Includes complete kit with all the necessary materials to score 25 administrations.  
Item 2600

**Evaluate receptive vocabulary**

The TVIP can help you assess the vocabulary of Spanish-speaking and bilingual students. Items were carefully selected for their appropriateness for Spanish-speakers from Mexico and Puerto Rico.

- PPVT™-4 items identified as appropriate for Spanish speakers were translated, then reordered by difficulty based on research results.  
- Normative scores based on the performance of 2,704 monolingual individuals in Mexico and Puerto Rico.
Boehm-3
Boehm Test of Basic Concepts, Third Edition

OVERVIEW

Age Range: Grades K–2
Completion Time: 30–45 minutes for classroom administration; 15–25 minutes for individual administration
Materials Needed: Includes complete kit with all the necessary materials to score 1 administration. Item 015402080X

Evaluate for comprehension of basic concepts

The Boehm-3 is based on research that identified the 25 basic concepts most frequently used by teachers in kindergarten, first-, and second-grade classrooms. Each concept is tested twice to verify the child’s understanding.

- Items on the English edition were adapted for Spanish speakers.
- Normative scores for the Spanish version were based on the performance of 1,100 monolingual and bilingual speaking children in the United States.

Boehm-3 Preschool
Boehm Test of Basic Concepts, Third Edition Preschool

OVERVIEW

Age Range: 3:0–5:11
Completion Time: 20–30 minutes
Materials Needed: Includes complete kit with all the necessary materials to score 25 administrations. Item 015802090X

Assess preschoolers for comprehension of basic concepts

The Boehm-3 Preschool helps you identify children who lack understanding of basic relational concepts so that you can provide intervention sooner, increasing their chance of success in school.

- Items on the English edition were adapted for Spanish speakers.
- Normative scores for the Spanish version were based on the performance of more than 500 monolingual and bilingual preschoolers in the United States.
BSRA™-3
Bracken School Readiness Assessment, Third Edition

OVERVIEW
Age Range: 3:0–6:11
Completion Time: 10–15 minutes
Materials Needed: Includes complete kit with all the necessary materials to score 25 administrations.
Item 0158033728

Quickly screen concept knowledge of young children
Brief and easy to administer, the BSRA-3 helps you determine if a child is ready for school. Includes five subtests to assess basic concepts related to school readiness: Colors, Letters, Numbers/Counting, Size/Comparison, and Shapes.

• Spanish norms can be developed using the Spanish record form with your local Spanish-speaking population.

BBCS™-3:R and BBCS™-E
Bracken Basic Concept Scale, Third Edition: Receptive Bracken Basic Concept Scale: Expressive

OVERVIEW
Age Range: 3:0–6:11
Materials Needed: Includes complete English kits of BBCS-3:R and BBCS:E with all the necessary materials to score 25 administrations of each scale.
Items 0158338995, 0158338901, and 0158338979

Assess for early expressive use and comprehension of basic concepts
The BBCS-3:R and BBCS:E help you evaluate a child’s concept acquisition and school readiness. Together, these tools help assess a child’s basic concept skills receptively and expressively.

• Items on the English edition were adapted for Spanish speakers.
• Research study conducted with 61 monolingual and bilingual children in the United States.
• Means and standard deviations are provided for Spanish speakers based on research results.

OLAI
The Oral Language Acquisition Inventory & The Oracy Instructional Guide

OVERVIEW
Age Range: Pre K–Grade 3
Completion Time: Two short sessions
Materials Needed: Includes the instructional guide. Item 0768555175

Assess and develop both English and Spanish language literary skills
The OLAI helps you quickly assess the most common language structures children use expressively. The Oracy Instructional Guide, a companion component, offers you guidance in helping clients build language skills in both English and Spanish.

• English items were adapted for Spanish speakers.
• Offers criterion scores for Spanish speakers
OASES™<br>A EN<br>Overall Assessment of the Speaker’s Experience of Stuttering

**OVERVIEW**

- **Age Range:** 18 and older
- **Completion Time:** 20 minutes or less
- **Materials Needed:** Includes complete kit with all the necessary materials to score 25 administrations. *Item 30411*

**Measure the impact of stuttering**

The OASES assessment uniquely measures the impact of stuttering on a person’s life in multiple life situations—unlike most other stuttering instruments, which focus mainly on the frequency and type of stuttering events. Brief yet comprehensive, this evidence-based tool can help support effective intervention.

- English items were adapted for Spanish speakers.

CLQT  T SN<br>Cognitive Linguistic Quick Test

**OVERVIEW**

- **Age Range:** 18:0–89:11
- **Completion Time:** 15–30 minutes
- **Materials Needed:** Includes English examiner’s and stimulus manuals and 15 each Spanish response booklets and record forms. *Items 0158328019, 0158328027, and 0158328043*

**Quickly measure cognitive/linguistic skills**

CLQT helps you quickly obtain severity ratings for five primary domains of cognition in adults with known or suspected neurological impairment as a result of stroke, traumatic brain injury, or dementia.

- Items on the English edition were adapted for Spanish-speaking adults.
- Thirty-one monolingual and bilingual adults were tested to obtain feedback from clinicians about the appropriateness of the Spanish edition for adults in the United States.
Developmentally age-appropriate measure to help evaluate social and emotional behavior

The ITSEA provides a comprehensive screening instrument that was developed in response to the need for early identification of social and emotional problems at a critical time in children’s development. The ITSEA contains items based on standards outlined by the DSM–IV®, the APA, and the Zero to Three Diagnostic Classification: 0–3.

Identify red-flag indicators of atypical social and emotional behavior in only 10 minutes

The BITSEA, which comprises the most discriminating ITSEA™ items, provides you with an effective, efficient first-stage screener to help identify children who may need further evaluation regarding social-emotional problems. Follow up with the ITSEA for more comprehensive evaluation.

Simplifies large-group screening

DIAL-4 helps you quickly assess large groups across learning domains—using fun activities that keep children engaged. DIAL-4 provides scores for all five early childhood areas: motor, language, concepts, self-help development, and social development. Speed DIAL is appropriate for quick screening in smaller settings, such as departments of public health, pediatric offices, health fairs, homes, and classrooms.
Sensory Profile™ 2

Evaluate children’s sensory processing patterns at home, school, and in the community

OVERVIEW

Age Range: Birth–14:11
Completion Time: 10–15 minutes
Materials Needed: Includes manual and 1 pack of each English form for Sensory Profile 2 (Infant, Toddler, Child, Short, and School Companion Forms) Item 0158700007
For more information on Spanish components, visit SensoryProfile.com.

In combination with your skills, the Sensory Profile 2 helps you determine how sensory processing may be contributing to or interfering with the child’s participation in home, school, and community based activities.

- Spanish caregiver questionnaires are available for the Infant, Toddler, Child and Short Sensory Profile 2, for both paper-and-pencil and online administration.
- Spanish caregiver questionnaires were validated on 138 Spanish speaking caregivers alongside the main U. S. standardization project. Professionals use the English normative data; Spanish mean scores and standard deviations are available.

## Make strides on your professional development path

We offer a wide range of complimentary and fee-based webinars to help you take the next steps in your professional development journey. Whether you are just beginning to use one of our tools or need more advanced training on data interpretation, we have profession-specific training sessions to meet your needs.

Please visit PearsonClinical.com/ Webinars for more information about past and upcoming webinars.

## Qualification Policies

Pearson is committed to maintaining professional standards in testing. A central principle of professional test use is that individuals should use only those tests for which they have the appropriate training and expertise. Pearson supports this principle by stating qualifications for the use of particular tests, and selling tests to individuals who provide credentials that meet those qualifications. Qualification levels range from A: no special qualifications to C: a high level of expertise in test interpretation.

For questions about qualification levels or to place an order, please call us at 800.627.7271 or visit our website at PearsonClinical.com. Search for “Spanish.”
