The RBANS® Update provides a brief, individually administered battery to detect and monitor cognitive decline or neurocognitive status. The instrument enables clinicians to quickly assess multiple domains, including—Attention, Immediate and Delayed Memory, Language, and Visuospatial/Constructional.

**Overview**

*Brief, individually administered battery to assess neuropsychological status*

**Administer to:** Individuals 12:0–89:11  
**Qualification Level:** C  
**Completion Time:** 30 minutes  
**Administration:** Q-interactive® (digital) or paper and pencil  
**Scoring Options:** Q-interactive or manual scoring  
**Report Options:** Index standard scores, sub-test standard scores, total score  
**Other Languages:** Spanish (Forms A and B)  
**Publication Date:** 2012

**Parallel Forms**

Ideal for measuring change over time, RBANS Update offers four parallel forms. Form A offers a single set of norms based on age, gender, race, education, and geographic region with equating studies and adjustments for Forms B-D and Spanish Form A.

**Users & Applications**

This instrument is used by clinicians to:

- Screen for deficits in acute-care settings
- Track recovery during rehabilitation
- Track progression of neurological disorders
- Screen for neurocognitive status in adolescents
- Identify inclusion/exclusion, efficacy, and cognitive side effects in clinical trials

Now Available on Q-interactive®
