CELF®-5 Screening Test

The CELF-5 Screening Test helps you quickly determine if a student needs further testing to identify a language disorder. Appropriate for students ages 5:0 through 21:11, this tool is the only standardized screening measure available for older school-aged students!

New Features

- Now includes a pragmatics screening task! Use CELF-5 to screen morphology, syntax, semantics, and pragmatics language skills
- Test items are a subtest of the CELF-5 diagnostic assessment. If you use CELF-5 for follow up testing, you can transfer the responses from the screening test to the CELF-5 protocol. No need to re-administer the test items, reducing CELF-5 administration time!
- A cost-effective screening tool for children in Kindergarten round-up
- Quick and efficient: administer and score in 15 minutes
- Provides research-based criterion scores based on a standardization sample of over 2000 students tested throughout the United States
- Uses colorful illustrations that keep students engaged
