Identify and Manage Behavior and Emotional Strengths and Weaknesses

Children and young adults with emotional and behavioral issues need the help of professionals like you to help them thrive at home and in school. The Behavior Assessment System for Children, Third Edition is the gold standard for identifying and managing behavioral and emotional strengths and weaknesses.

Assessing the behavioral and emotional functioning of children and adolescents can be an effective tool in promoting student success.

Working Together

The BASC-3 family of products allows you to screen groups of children, conduct comprehensive evaluations, plan and deliver effective interventions, and monitor progress all with one flexible, integrated system. This makes it easier than ever for you to create a complete picture of the young person you are working with.

Digital Enhancements

The BASC-3 is available on Q-global®, a secure, web-based platform that can be used to deliver digital administrations of teacher, parent, and self-report forms and provide scoring and reporting for web-based and paper-based administrations.

Report options include Profile, Interpretive, Intervention, Clinical, Progress, and a new Integrated report.

Screening and Benchmarking

BASC-3 Behavioral and Emotional Screening System (BESS)

Available on Q-global and Review 360®

The BASC-3 BESS can be used to indicate the level of behavioral and emotional functioning. At a school or class level, the BASC-3 BESS can identify improvement areas that can be directly targeted using the Behavioral and Emotional Skill-Building Guide, part of the BASC-3 family of products. At an individual level, the BASC-3 BESS can identify problem areas that need to be addressed.

Features:

• Assesses a wide array of behaviors that represent both behavioral problems and strengths, including internalizing problems, externalizing problems, school problems, and adaptive skills.
• Comprehensive and efficient, the forms can be completed quickly. Teachers or parents can complete forms in five minutes or less. Student forms can be completed quickly in a group setting and can be done at the end of other group-based testing (e.g., school-wide academic testing).
• The Behavioral and Emotional Risk Index provides an overall indicator of functioning, while sub-index scores are provided that indicate more targeted areas of behavioral and emotional functioning.
• Validity indexes help evaluate the quality of the responses that have been provided.

Comprehensive Assessment

Help children thrive in their school and home environments with effective behavior assessment. The BASC 3™ holds an exceptional track record for providing a complete picture of a child's behavior by applying a triangulation method for gathering information.

Analyze the child's behavior from three perspectives—Self, Teacher, and Parent using a comprehensive set of rating scales and forms to help you understand the behaviors and emotions of children and adolescents.

Multiple Perspectives:

Teacher Rating Scales — Measure adaptive and problem behaviors in the preschool or school setting in

Parent Rating Scales — Measure both adaptive and problem behaviors in the community and home setting in

Self-Report of Personality

Enhanced Digital Capabilities

New Features:

1. New Content: Improved and updated items for each scale, along with additional indexes for evaluating Executive Functioning.

2. Choice of web-based digital assessments via Q-global™. Remove the need for finding and sending paper forms, while reducing costs by only paying for digital forms that are returned.

3. The Student Observation System (SOS) is now available digitally via laptop, tablet, and phone devices enabling on-the-fly administration, no expensive app is needed. Simply pay for each observation that is used to generate a report.

4. The Structured Developmental History can now be sent to parents or caregivers electronically or can be completed in the office using a tablet device or computer. This digital component integrates observation that is used to generate a report.

5. The Student Observation System (SOS) is now available digitally via laptop, tablet, and phone devices enabling on-the-fly administration, no expensive app is needed. Simply pay for each observation that is used to generate a report.

6. The Structured Developmental History can now be sent to parents or caregivers electronically or can be completed in the office using a tablet device or computer. This digital component integrates observation that is used to generate a report.

7. The Student Observation System (SOS) is now available digitally via laptop, tablet, and phone devices enabling on-the-fly administration, no expensive app is needed. Simply pay for each observation that is used to generate a report.

8. The Student Observation System (SOS) is now available digitally via laptop, tablet, and phone devices enabling on-the-fly administration, no expensive app is needed. Simply pay for each observation that is used to generate a report.

9. The Student Observation System (SOS) is now available digitally via laptop, tablet, and phone devices enabling on-the-fly administration, no expensive app is needed. Simply pay for each observation that is used to generate a report.

10. The Student Observation System (SOS) is now available digitally via laptop, tablet, and phone devices enabling on-the-fly administration, no expensive app is needed. Simply pay for each observation that is used to generate a report.

New Features:

1. New Content: Improved and updated items for each scale, along with additional indexes for evaluating Executive Functioning.

2. Choice of web-based digital assessments via Q-global™. Remove the need for finding and sending paper forms, while reducing costs by only paying for digital forms that are returned.

Evidence-based Intervention

Revised and Updated BASC-3 Intervention Guide and Materials

Behavior Intervention Guide

The BASC 3 Behavior Intervention Guide, available digitally or in-print, provides a collection of evidence-based interventions designed to help remediate emotional and behavioral problems experienced by children and adolescents.

Comprehensive, how-to content is organized around some of the most common problem behaviors observed by teachers and parents and reported by children themselves.

To support this Guide, Parent Tip Sheets are available for a number of behavioral and emotional problems. These sheets enable parents to work more effectively with professionals to become an active part of their child’s success. The information is designed to help parents learn about the problems being experienced and offer different strategies which can be used at home to help address these problems or concerns. In addition, a number of reproducible forms and handouts are available in the Q-global Resource Library, aimed at maximizing the efficiency and effectiveness of the intervention strategies.

For Use in the Classroom

The new Behavioral and Emotional Skills-Building Guide, part of the BASC 3 family of products, provides Tier 1 and Tier 2 support for improving behavioral and emotional skills. Teachers, counselors, social workers, or other professionals can follow the lesson plans and activities as prescribed or can customize them according to specific needs and circumstances.

The activities, small group or classroom-based lessons provided in the Guide promote and develop a number of core behavioral and emotional skills, such as communicating, problem solving, learning new skills, and relaxation strategies. When used in conjunction with the BASC-3, the Guide can be used to enhance the skills of the students and promote behaviors that lead to school-wide success.

BASC-3 Flex Monitor

The Flex Monitor is an existing addition to the BASC-3 family, which enables psychologists and professionals in a school or clinical environment to monitor and track the effects of a behavioral intervention.

A web-based tool, the Flex Monitor can be used to develop effective progress monitoring forms. Choose from a pool of over 600 items to create a custom teacher, parent, or self-report monitoring form or simply select from one of the several standard monitoring forms available. Reliability estimates based on a nationally representative sample of children or adolescents. Reports can be generated for up to 10 administrations of a form, with results being presented both graphically and in tabular format.

Additional information on the significance of the change in scores is provided, helping to establish the effectiveness of an intervention strategy.

BASC-3 Parenting Relationship Questionnaire (BASC-3 PRQ™)

Capturing a parent or caregiver's perspective on the parent-child relationship is an important step in helping professionals guide appropriate and effective intervention plans. The PRQ assesses traditional parent-child dimensions such as attachment and involvement and provides information on parenting style, confidence, stress, and satisfaction with the child's school.

This comprehensive tool offers a quick and reliable means of gathering valuable information and can be used in school, clinical, pediatric, counseling, and other settings. It should be administered to mother and/or father (or caregiver) of children ages 2 through 18 years and includes the following features:

- Reliability estimates based on a nationally representative sample of children or adolescents.
- Additional information on the significance of the change in scores is provided, helping to establish the effectiveness of an intervention strategy.
- Two-levels: preschool (ages 2–5; 60 items) and child/adolescent (ages 6–18; 87 items).
- Multiple dimensions that are relevant to the development of strong and healthy parent-child relationships and that are particularly relevant for use in school, clinical, and therapeutic settings.
- Highly interpretable scales that were developed with a balance of theory and empirical data.

BASC-3 PRQ™ provides information on parenting style, confidence, stress, and satisfaction with the child's school, along with additional indexes for evaluating Executive Functioning.
Evidence-based Intervention

Revised and Updated BASC-3 Intervention Guide and Materials

Behavior Intervention Guide

The BASC-3 Behavior Intervention Guide, available digitally or in-print, provides a collection of evidence-based interventions designed to help remediate emotional and behavioral problems experienced by children and adolescents. Comprehensive, how-to content is organized around some of the most common problem behaviors seen by teachers and parents and reported by children themselves.

To support this Guide, Parent Tip Sheets are available for a number of behavioral and emotional problems. These sheets enable parents to work more effectively with their children at home, while reducing costs by only paying for digital forms that are returned.

For Use in the Classroom

The new Behavioral and Emotional Skill-Building Guide, part of the BASC-3 family of products, provides Tier I and Tier II support for improving behavioral and emotional skills. Teachers, counselors, social workers, or other professionals can follow the lesson plans and activities as prescribed or can customize them according to specific needs and circumstances.

The activities, small group on classroom-based lessons provided in the Guide, promote and develop a number of behavioral and emotional skills. Teachers, counselors, social workers, and others can follow the lesson plans and activities as prescribed or can customize them according to specific needs and circumstances.

Choice of end-to-end digital assessment via Q-global®. The Structured Developmental History scale, along with additional indexes for evaluating emotional and behavioral skill levels, is now available digitally via laptop, tablet, and phone devices that are returned.

New Features:

- New Content: Improved and updated items for each scale, along with additional indexes for evaluating Executive Functioning.
- Choice of end-to-end digital assessments via Q-global®. Remove the need for binding and scanning paper forms, while reducing costs by only paying for digital forms that are returned.
- The Student Observation System (SOS) is now available digitally via laptop, tablet, and phone devices enabling the on-the-fly administration; no expensive app is needed. Simply pay for each observation that is used to generate a report.
- The Student Observation System (SOS) is now available digitally via laptop, tablet, and phone devices enabling the on-the-fly administration; no expensive app is needed. Simply pay for each observation that is used to generate a report.
- The Structured Developmental History can now be sent to parents or caregivers electronically or be completed in the office using a tablet device or computer. This digital component integrates qualitative data with Rating Scale results, allowing faster access to important diagnostic information.

Parental Involvement

BASC-3 Parenting Relationship Questionnaire (BASC-3 PRQ™)

Capturing a parent or caregiver’s perspective on the parent–child/adolescent relationship is an important step in helping professionals guide appropriate and effective intervention plans. The PRQ assesses traditional parent–child dimensions such as attachment and involvement and provides information on parenting style, confidence, stress, and satisfaction with the child’s school.

This comprehensive tool offers a quick and reliable measure of the quality of the parent–child relationship and that are particularly relevant for use in clinical, and therapeutic settings.

- Highly interpretable scales that were developed with a balance of theory and empirical data.
- Multiple dimensions that are relevant to the development of strong and healthy parent–child relationships and that are particularly relevant for use in clinical, and therapeutic settings.
- Two levels: preschool (ages 2–5; 60 items) and child/adolescent (ages 6–18; 87 items).

Evidence-based Intervention

BASC-3 Flex Monitor

The Flex Monitor is an exciting addition to the BASC-3 family, which enables psychologists and professionals in a school or clinical environment to monitor and track the effects of a behavioral intervention.

A web-based tool, the Flex Monitor can be used to develop effective progress monitoring forms. Choose from a pool of over 400 items to create a custom teacher, parent, or self-report monitoring form or simply select from one of the several standard monitoring forms available. Reliability estimates based on a nationally representative sample of children or adolescents. Reports can be generated for up to 10 administrations of a form, with results being presented both graphically and in table-based format.

Additional information on the significance of the change in scores is provided, helping to establish the effectiveness of an intervention strategy.

Enhanced Digital Capabilities

New Features:

1. New Content: Improved and updated item scales, along with additional indexes for evaluating Executive Functioning.
2. Choice of on-to-digital assessments via Q-global®: Remove the need for folding and scoring paper forms, while reducing costs by only paying for digital forms that are returned.
3. The Student Observation System (SOS) is now available: Easily evaluate student behavior using a tablet device or computer.
4. The Structured Developmental History (SDH) can now be sent to parents or caregivers electronically or be completed in the office using a tablet device or computer.

Multiple Perspectives:

Teacher Rating Scales—Measure adaptive and problem behaviors in the preschool or school setting in Teacher Rating Scales.

Parent Rating Scales—Measure adaptive and problem behaviors in the preschool or school setting in Parent Rating Scales.

Parental Involvement

Evidence-based Intervention

Revised and Updated BASC-3 Intervention Guide and Materials

For Use in the Classroom

The BASC-3 Intervention Guide, available digitally or in print, provides a collection of evidence-based interventions designed to help remediate emotional and behavioral problems experienced by children and adolescents. Comprehensive, how-to content is developed to help parents learn about the problems being experienced and offer different strategies which can be used at home to help address these problems or concerns. In addition, teachers, counselors, social workers, and other professionals can follow the lesson plans and activities as prescribed or can customize them according to specific needs and circumstances.

The activities, small group on-classroom-based lessons provided in the Guide, promote and develop a number of core behavioral and emotional skills, such as communicating, problem solving, learning effective, and relaxation strategies. When used in conjunction with the BASC-3 BESS, this guide can be used to enhance the skills of the students and promote behaviors that lead to school-wide success.

BASC-3 Flex Monitor

The Flex Monitor is an exciting addition to the BASC-3 family, which enables psychologists and professionals in a school or clinical environment to monitor and track the effectiveness of a behavioral intervention.

A web-based tool, the Flex Monitor can be used to develop effective progress monitoring forms. Choose from a pool of over 600 items to create a custom teacher, parent, or self-report monitoring form or simply select from one of the several standard monitoring forms available. Reliability estimates based on a nationally representative sample of children or adolescents are provided for the total score for all Flex Monitor forms, enabling a comparison of the score change over time as well as performance compared to an age-based, nationally representative sample of children or adolescents. Reports can be generated for up to 10 administrations of a form, with results being presented both graphically and in table-based format.

Additional information on the significance of the change in scores is provided, helping to establish the effectiveness of an intervention strategy.

BASC-3 Parenting Relationship Questionnaire (BASC-3 PRQ™)

The BASC-3 Parenting Relationship Questionnaire (BASC-3 PRQ™) provides information on parenting style, confidence, stress, and satisfaction with the child’s school.

The new Behavioral and Emotional Skill Building Guide, part of the BASC-3 family of products, provides Tier I and Tier II support for improving behavioral and emotional skills. Teachers, counselors, social workers, or other professionals can follow the lesson plans and activities as prescribed or can customize them according to specific needs and circumstances.

The activities are organized around some of the most common problem behaviors seen by teachers and parents and reported by children themselves.

To support this Guide, Parent Tip Sheets are available for a number of behavioral and emotional problems. These sheets enable parents to work more effectively with professionals to become an active part of their child’s success. The information is designed to help parents learn about the problems being experienced and offer different strategies which can be used at home to help address these problems or concerns. In addition, a number of reproducible forms and handouts are available in the Q-global Resources library, aimed at maximizing the efficiency and effectiveness of the intervention strategies.

BASC-3 BESS

The BASC-3 BESS, this evidence-based intervention strategy, leads to school-wide success. It is designed for specific needs and circumstances.

Tier I and Tier II support for improving behavioral and emotional skills. Teachers, counselors, social workers, or other professionals can follow the lesson plans and activities as prescribed or can customize them according to specific needs and circumstances.

The BASC-3 Intervention Guide and Materials

Revised and Updated BASC-3 Intervention Guide and Materials

For Use in the Classroom

The BASC-3 Behavior Intervention Guide, available digitally or in print, provides a collection of evidence-based interventions designed to help remediate emotional and behavioral problems experienced by children and adolescents. Comprehensive, how-to content is developed to help parents learn about the problems being experienced and offer different strategies which can be used at home to help address these problems or concerns. Identify and Manage Behavior and Emotional Strengths and Weaknesses

Children and young adults with emotional and behavioral issues need the help of professionals like you to help them thrive at home and in school. The Behavior Assessment System for Children, Third Edition is the gold standard for identifying and managing behavioral and emotional strengths and weaknesses.

Assessing the behavioral and emotional functioning of children and adolescents can be an effective tool in promoting student success.

Working Together

The BASC-3 family of products allows you to screen groups of children, conduct comprehensive evaluations, plan and deliver effective interventions, and monitor progress all with one flexible, integrated system. This makes it easier than ever for you to create a complete picture of the young person you are working with.

Digital Enhancements

The BASC-3 is available on Q-global®: a secure, web-based platform that can be used to deliver digital administrations of teacher, parent, and self-report forms and provide scoring and reporting for web-based and paper-based administrations.

Report options include Profile, Interpretive, Intervention, Clinical, Progress, and a new Integrated report.

Screening and Benchmarking

BASC-3 Behavioral and Emotional Screening System (BESS)

Available on Q-global and Review 360®

The BASC-3 BESS can be used to indicate the level of behavioral and emotional functioning. At a school or class level, the BASC-3 BESS can identify improvement areas that can be directly targeted using the Behavioral and Emotional Skill-Building Guide, part of the BASC-3 family of products. At an individual level, the BASC-3 BESS can identify problem areas of functioning that might be interfering with academic or social success and that might warrant a more comprehensive evaluation.

Features:

› Assess a wide array of behaviors that represent both behavioral problems and strengths, including internalizing problems, externalizing problems, school problems, and adaptive skills.
› Comprehensive and efficient, the forms can be completed quickly. Teachers or parents can complete forms in five minutes or less. Student forms can be completed quickly in a group setting and can be done at the end of other group-based testing (e.g., school-wide academic testing).
› The Behavioral and Emotional Risk Index provides an overall indicator of functioning, while sub-index scores are provided that indicate more targeted areas of behavioral and emotional functioning.
› Validity indexes help evaluate the quality of the responses that have been provided.

At a school or class level, the BASC-3 BESS can identify improvement areas that can be directly targeted using the Behavioral and Emotional Skill-Building Guide, part of the BASC-3 family of products. At an individual level, the BASC-3 BESS can identify problematic levels of functioning that might be interfering with academic or social success and that might warrant a more comprehensive evaluation.

Features:

- Assess a wide array of behaviors that represent both behavioral problems and strengths, including internalizing problems, externalizing problems, school problems, and adaptive skills.
- Comprehensive and efficient, the forms can be completed quickly. Teachers or parents can complete forms in five minutes or less. Student forms can be completed quickly in a group setting and can be done at the end of other group-based testing (e.g., school-wide academic testing).
- The Behavioral and Emotional Risk Index provides an overall indicator of functioning, while sub-index scores are provided that indicate more targeted areas of behavioral and emotional functioning.
- Validity indexes help evaluate the quality of the responses that have been provided.
