# QUICK REFERENCE

## Elevation of a Well-Respected Adult Personality Measure

The Millon® Clinical Multiaxial Inventory-IV (MCMI®-IV) is an adult personality instrument that uses Dr. Theodore Millon's revered scientific work to facilitate a strong clinical alliance between the clinician and patient. Its therapeutic focus provides the foundation upon which effective treatment decisions can be made.

## Guided by Both Research and Theory

The MCMI-IV is uniquely equipped to provide clinical insights that are grounded in both theoretically-guided principles and sound empirical research.

This instrument can help:

- » Identify deeper pervasive clinical issues
- » Facilitate treatment decisions
- » Assess disorders based on DSM-5® and ICD-10 classification systems

## Developed for Clinical Utility

**Strong Norm Set**—Based on a combined gender sample of 1,547 adult males and females with a wide variety of clinical diagnoses

**DSM-5 and ICD-10**—Aligned to both DSM-5 and ICD-10 code sets

**Brevity**—Can be completed in 25 to 30 minutes, allowing clinicians to maintain an efficient and productive clinical practice

**Updated Grossman Facet Scales**—Designed to help you interpret elevations on the Clinical Personality Patterns Scales and Severe Personality Pathology Scales

**New Turbulent scale**—Uses the recently re-outlined Turbulent personality pattern

## OVERVIEW

### Administer to:

Adults aged 18 and older

### Administration Time:

25–30 minutes (195 items, True/False)

### Scoring and Reporting:

Q-global®, Q Local™ and Mail-in

### Qualification Level:

C

# INSIGHTS INTO THE MIND

## Introducing a Spectrum of Personality Patterns

The MCMI®-IV overtly conceptualizes personality patterns on a new continuum, or spectrum, ranging from adaptive to maladaptive levels of functioning.

The MCMI-IV personality patterns, or scale spectrums, capture the patient's broad range of personality by way of three levels of personality functioning:

- » **Normal Style:** Generally adaptive personality patterns
- » **Abnormal Traits/Type:** Moderately maladaptive personality attributes
- » **Clinical Disorder:** Likelihood of greater personality dysfunction

## New Turbulent Scale

Dr. Millon recently re-outlined the Turbulent personality pattern as a person oriented toward an active life enhancement strategy. Individuals presenting with this personality pattern may encounter difficulties staying attuned to their environment, subsequently adversely affecting important relationships with others.

## Therapeutic Focus

The MCMI-IV enables the integration of test results with therapeutic practice. The improved Treatment Guide section of the interpretive report helps you make a connection with the patient right from the beginning.

## Scoring and Reporting

Administration, Scoring, and Reporting for the MCMI-IV is available on Q-global®, Pearson's web-based scoring and reporting platform.

Q-global offers:

- » 24/7 secure, web-based access
- » Portable use on mobile devices, laptops, and tablets
- » On-demand, reliable scoring and comprehensive reporting solutions

**Mail-in and Q Local™ scoring and reporting options also available!**
