

# PAL-II Math—More Than An Assessment... It's An Integrated Solution Package!

Now featuring  
 an enhanced  
 User's Guide!

## The only test to investigate the cognitive processes related to math

The *Process Assessment of the Learner™ - Second Edition Diagnostics for Math (PAL™ - II Math)* measures not only basic math skills, but also the development of cognitive processes that are critical to learning math skills and actual math performance.

## Understand WHY a student has difficulty in math

- Provides specific subtest administration and interpretation based on referral concern
- Helps in formulating a diagnosis of math disability
- Links to specific interventions
- Introduces novel quantitative and spatial working memory tasks associated with math computation skills
- Operates as a follow-up to earlier assessment

### OVERVIEW

#### Grade Range

K to 6

#### Norms

Scaled Scores and Cumulative Percentages

#### Administration

Time depends on the purpose of the assessment: Tier 1, Tier 2 or Tier 3

#### Qualification Level

B

## Enhanced User Guide

Evidence-based design for use at all RTI Tier levels—subtest selection, interpretation, and interventions.

- **Designed to fit the way you want to use it:** Works on any operating system, computer, tablet, or device that can display Adobe Acrobat (.pdf) files
- **No more disks:** Downloadable from [pearsonclinical.com](http://pearsonclinical.com). Web delivery allows use on newer devices without CD-ROM
- **Improved navigation:** Offers easier access to effectively use this powerful tool
- **Ability to print lesson sheets for use with students**

### The perfect companion to PAL-II Math

PAL-II Diagnostic Assessment for Reading and Writing measures the development of psychological processes directly related to the acquisition of reading and writing skills.
