PIPA™ is the first test to use when it comes to putting kids on the path to reading success.

PIPA is a nationally normed assessment specifically designed to assess the Phonological Awareness Skills of children as young as 4 years of age. In fact, research shows that phonological awareness is one of the best school-entry predictors of future reading and spelling. With PIPA’s flexible and easy to administer subtests, you have valid and reliable information required by the Early Reading First initiative.

To order, call 800.627.7271 or visit our new website at PsychCorp.com for more information.
PIPA is the first test you should give preliterate children to put them on the path to reading success.

Barbara Dodd, Ph.D.; Sharon Crosbie, Ph.D.; Beth McIntosh, B.Sp.; Tania Teitzel, B.Sp.; and Anne Ozanne, Ph.D.

Put a child on the path to reading success with this easy to administer inventory of phonological awareness skills.

- Helps identify children at risk for reading failure.
- Fulfills phonological awareness requirements of the Early Reading First and Reading First initiatives.

- Includes six subtests:
  - Rhyme Awareness
  - Alliteration Awareness
  - Sound Segmentation
  - Syllable Segmentation
  - Sound Isolation
  - Letter-Sound Knowledge

- Uses a flexible format that lets the administrator select the appropriate subtests.
- Contains an easel-backed stimulus book, tabbed by subtest, with detailed administration and scoring directions.
- Includes item analysis tables on the Record Form for each subtest.
- Can be used as an outcomes-based measure.
- Includes norms based on data collected from the U.S. Census Bureau (2000).
- Can be administered by SLP’s, teachers, and paraprofessionals.
