Overview
Q-interactive is Pearson’s digital system for the administration and scoring of individually-administered tests. This 90-minute session is designed to teach both new and established Q-interactive users how to use the system in their practice. It walks attendees through a sample assessment process that includes how to set up iPads, create clients, assign a test battery, administer tests on the Assess app, generate score reports, and access support materials.

Learner Outcomes
As a result of this activity, the participants will be able to:

1. Identify the differences between Q-interactive Central and Q-interactive
2. Demonstrate the Q-interactive Assess app and perform actions such as: score test items, display stimuli on the Client/Stimuli iPad, listen to audio recording, and edit test items.
3. Complete an assessment session in Q-interactive Assess and successfully score a report on Q-interactive Central.
4. Connect and use the on-demand training resources and test material on the Support tab of Q-interactive Central

About the Presenters

Jarett Lehner is the Q-global and Q-interactive Training and Implementation Consultant at Pearson. As the Training and Implementation Consultant, Jarett works with new Q-interactive and Q-global users to build platform familiarity via system navigation and the digital assessment administration process, both in person and nationally via public webinars. Jarett’s background is in Psychology and he graduated from the University of Minnesota-Duluth’s College of Education and Human Service Professions. Prior to joining Pearson in 2015, Jarett worked as a Psychometrist at an outpatient mental health clinic in Minneapolis, MN.
